Be READY when called into action.

TERi™ Androgynous Geriatric Trainer

A full-body elderly patient care trainer configurable in male or female variations for medical simulation. Evolving from our GERi™/KERi™ manikins, TERi™ has a more realistic look and feel to represent human anatomy, with weight distributed to represent a real patient for lifting and carrying.

Each version is affordable and durable with upgradable items.

- **Patient Care Trainer¹** – General patient care, daily living assistance simulation platform.
- **Patient Skills Trainer²** – Physical skills practice simulation platform with injection/IV, catheterization, cardiovascular and respiratory support.
- **Auscultation Patient Skills Trainer⁴** – All the features of Patient Skills Trainer with added auscultation. Lung sounds at five anterior, ten posterior, and two midaxillary locations. Six anterior heart sites.
- **Patient Simulator³** – Comprehensive and complete simulation platform including patient monitoring capability.

The next generation of elderly care simulation is here.

PROM: Passive Range of Motion¹⁻⁴
Seating, Laying, Finger/Toe Manipulation with No Effort from Patient

Cardiovascular Support²⁻⁴
Carotid Pulses, CPR with Quality Performance Metrics & Auscultation

Intravenous, Injection, Subcutaneous Injection Sites^{2-4, optional on 1}
